The programme will teach you how to plan, organize, and write clear, well-structured, and accurate texts for publication. Realistic communicative activities will help you present your ideas with clarity and precision.

There are 3 x 3-hour workshops in this series, which form a short English for Academics Writing Course, designed for Lecturers, Researchers and Postdocs at high Upper Intermediate and Advanced levels, who need to improve their written English skills in an academic context.

The programme will be run as 3 closed workshops, online in the platform Zoom, as 3 x 3 hour sessions (2 x 90 minutes with 15 minutes break between).

**WORKSHOP 1**
We will look at what Academic English is and the structure of articles, focusing on abstract writing. We will explore the key points about abstracts, analyzing common errors and how to fix them. You will be asked to bring your own abstract - you will give and receive some feedback - and finally we will look at the first rule of the comma.

**WORKSHOP 2**
We will look at communicating with a non-expert and focus on introduction writing - looking at paragraph structuring and analyzing the language/sentence structuring. We will also explore signposting and linking between sentences and paragraphs, being concise - reducing prepositional phrases and avoiding wordiness. Finally, we will look at the second and third rules of the comma.

**WORKSHOP 3**
We will look at using plain English, how to write critically and use hedging. We will explore the conclusion section, thinking about titles and wrap up by looking at some further, helpful resources for writing.
