Cooperative learning and how to use it

Summary :
Cooperative learning is an approach that is based on natural human interactions in which students work together to solve problems, thereby improving not only their knowledge but also social skills. Thanks to cooperative learning, we significantly improve active participation in class and help our students develop their core transversal competencies.

:

During the workshop we will try to answer the following questions:

- What is cooperative learning? What are its essential elements?
- How to plan and support cooperative learning?
- What are the most commonly used methods of cooperative learning?
- How to evaluate cooperative tasks?
